

GVA Abrasive Membrane Valve

The Airblast GVA Abrasive Membrane Valve is designed for the precise metering of abrasive into the compressed air flow at the outlet of a blast machine.

The GVA Abrasive Membrane Valve design prevents the valve top body from coming into contact with the abrasive stream. The abrasive stream only touches the valve bottom and the membrane, which may be quickly replaced when worn. The abrasive is metered by means of closing the membrane by a metering screw.

Airblast offers a full selection of metering valves. Contact Airblast to discuss which metering valve is most suitable for your specific application.

GVA Abrasive Membrane Valves

Part no.	Description
6070000	GVA 12 - Abrasive Membrane Valve 1/2"
6070500	GVA 25 - Abrasive Membrane Valve 1"
6071000	GVA 32 - Abrasive Membrane Valve 1 1/4"
6071500	GVA 38 - Abrasive Membrane Valve 1 1/2"

GVA Abrasive Membrane Valves - Spares

Part no.	Description
6071100	Membrane for GVA-12
6071200	Membrane for GVA-25, GVA-32 and GVA-38
