

# AB2050

Vacuum Cleaner - Electric

**AIRBLAST**

This electrically driven vacuum suction machine is characterized by its solid build and finish, simplicity and high operating reliability. With its 3 pieces 1,000 W strong exhaust motors can be used for cleaning of (heavy) soiled floors, workplaces and machines. In addition, the AB2050 can also be used for vacuuming of abrasive, granulates and coarse dirt parts.

The machine is supplied with a 5 m polyurethane lined, very wear-resistant suction hose and various nozzles. Just as with the AB2050 PN vacuum suction machine it can be drained through a sucked up and collected material, to the dust-drain valve confirmed, plastic bag.

The aspirated material can be discarded, by the machine to lift (lifting) and above a large waste bin or bag. The machine is supplied with a 5 meter very wear-resistant polyurethane lined, very wear-resistant suction hose and various different suction mouths.

## **Applications:**

- Cleaning of floors
- Cleaning of machines
- Cleaning of blasted area
- Removing of abrasive

## TECHNICAL SPECIFICATIONS AB2050 EL

	<b>Electric</b>
Dust bin capacity (ltr.)	35
Standard hose length (mtr.)	5
Max. hose length (mtr.)	15
Empty weight (kgs.)	52
Power (W)	3000
Voltage	240 VAC / 50 Hz / 1 Ph
Air movement (nm <sup>3</sup> /min. @ 7 bar)	520
Max. static pressure	200 mbar
Noise level (dB(A))	80
Dimensions in cm. (LxWxH)	140 x 52 x 52

### Vacuum cleaning machine AB2050 EL

Delivery includes:

- the complete blasting unit
- hose set consisting
- 3 standard suction tools
- operator's manual
- export packaging

#### Machine options and accessories:

\*) Remote control system.
