

# AIRBLAST ABRASIVES

Shinox - Stainless Steel Shot

**AIRBLAST**

## **Product and applications**

Airblast Shinox is our stainless steel shot with excellent durability. The material is being used as a blasting medium where inox surfaces can be blasted, but also in foundries for cleaning aluminum, stainless and zinc casting. Less dust is created by using Shinox and it gives the surface a bright appearance.

## Chemical composition

Chrome	Silicon	Carbon	Manganese	Nickel
18%	2%	0,20%	1%	8%

## Physical properties

Grain shape	:	Spherical / round	
Hardness	:	new	: 250 HV
	:	working mix	: 350 HV
Microstructure	:	Austenitic	
Color	:	Grey	

## Sizes

AS330	0,710- 1,40 mm
AS280	0,500 to 1,000 mm
AS170	0,425 to 0,850 mm
AS110	0,150 to 0,500 mm
AS070	0,075 to 0,355 mm
AS030	0,045 to 0,180 mm

## Packaging

- 25kg pp bags on EURO pallet
